

CURE IT

GRP ROOFING SYSTEM

EVO

GRP Roofing has evolved...

The new Cure It EVO System has been designed for application without the need for OSB decking boards **DIRECT TO INSULATION BOARDS** using EVO Primer.

**NO DECKING BOARDS
REQUIRED***

LOWER COSTS

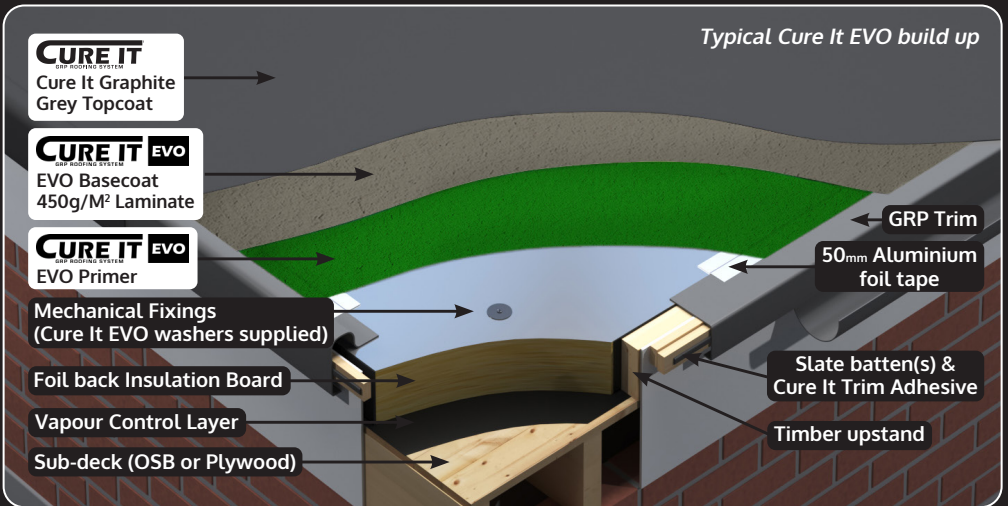

EASIER FITTING

**QUICKER
INSTALLATION**

WWW.CUREIT.COM/EVO

- Installation is quicker and more cost effective than the traditional method for installing GRP warm roofs.
- Easy to use system: simply fit the insulation, apply the primer and EVO Basecoat laminate then Topcoat to finish.
- Download the app and see our Youtube channel for EVO installation guides, videos, and materials estimation.

Ask about our training days...

LOWER COSTS

- Standard insulation fixings and ply-decking can be used in build-up
- Only one decking layer required
- 20% cheaper material cost¹

EASIER FITTING

- Less specialised installation process
- Uses more standardised components
- Simplified trim installation

QUICKER INSTALLATION

- Over 50% fewer fixings required²
- Reduces warm roof installation time by over 20%
- Decking and insulation build-up can be installed by 3rd party joiners/builders

¹Excluding installation costs compared to typical GRP warm roof.

²Compared to typical GRP standard weight warm roof construction.

^{*}structural sub-deck still required.
